

ALGOTRADES

AUTOMATIC INVESTING & DAY TRADING SYSTEMS

Letter of Recommendation – Michael Kondo

My name is Michael Kondo, I have been using the AlgoTrades automated futures trading system.

Over the last couple of years I have traded stocks, Forex and Indexes with really not much success. As a trader I find it very hard to remove the emotion and stick to a trading plan and system. I learned the hard way having a number of winning trades and then only to lose my account capital to many losing trades because I don't know when to cut my loses.

After a stressful experience of cutting my loses, I decided that I needed another approach to trading. That is when I found the AlgoTrades automated futures system. Firstly, I read Chris Vermeulen's book on Technical Trading Mastery and was very impressed with the methodology and Chris's technical trading experience.

I decided that the AlgoTrades automated investment systems is better suited for me. It removes the emotion and guess work out from trading.

It is proven, back-tested and traded for many years with a record of return on investment in all market cycles. It is also good to know that the system is traded with real money by its founder.

Trading an automated system has also given me extra time to spend with family and friends instead of being next to the laptop to execute and monitor trades. The AlgoTrades system does this automatically for you, and also allows you to log into your account to look at open trades.

The AlgoTrades system has been very successful. The results achieved in a matter of a few months have been more than what I have achieved in a year from trading independently. I'm very pleased with the AlgoTrades trading system and the results it has achieved for me and would recommend it to my family and friends.

I'm also looking forward to new AlgoTrades trading systems in the near future to add to my investment portfolio.

Regards,
Michael Kondo

Letter of Recommendation – Rick Deleff

To Whom It May Concern:

In March 2014 I set up an account to invest using the futures auto trading system developed by Chris Vermeulen.

I didn't have the time or the knowledge to do this type of investing and achieve the type of consistent results that I believe can be achieved utilizing these automated investing techniques. I previously utilized an option trading system that also had risk management rules and trading rules established. I even allowed an experienced broker to do the trades for me based on his 9 years of experience. The result was mismanaged trades that didn't follow the established rules. There still needed to be an individual to pull the trigger on all the trades. The result was a loss of money after almost 4 years. I then continued my search for a better way.

With the AlgoTrades system there are no people involved in making the trades once the system is tied to the brokerage account. Once I saw the extensive back testing done on this system and also read the Technical Trading Mastery book to learn more about Chris and his investing philosophy and extensive experience I set up an account and began trading. So far it has met my expectations.

Having a degree in electrical engineering, I had a 17 year career designing automated control systems. Once a system is designed properly you just lock up the cabinet, leave the room and let the system work. This is exactly what Chris has done with the different investing platforms.

I believe this will give me as a small investor the same odds to achieve high investment returns as the large institutional investors with very little of my time. I would highly recommend anyone with the minimum capital requirements give the AlgoTradies System strong consideration.

Letter of Recommendation – Satish Bhave

To Whom It May Concern:

I have been one of the pioneering subscribers to AlgoTrades auto-trading system since its introduction and I am happy to say that it has, so far, performed above my expectations. Before that, I have been doing my own investments for few years and I have been facing challenges...

- 1) Being a working professional, it's always a challenge to find time to read and track so many investment options and then study the charts / price actions etc. to make wise decisions.
- 2) Being in Asia, there is always time zone problem and it's usually very late when the markets are trading at their peaks to make right decisions.
- 3) Once you make trading decisions, it's very difficult to control your emotions and many times I have cut my position in profit early while letting large losses run.
- 4) Any investment decision needs to protect you capital well and many times your personal judgment runs against it.

So, I was looking for a solution to overcome these issues and that's when Chris introduced AlgoTrades and I jumped into it. He has proven that his system takes care of all above issues. One of the key aspects I like of Chris' trading philosophy is about safety of capital and how he always tries to protect it and not go after risky trades while still delivering a handsome return on your capital.

I hope AlgoTrade system continues to grow my portfolio and I hope Chris looks at introducing more such systems dealing in forex / commodities etc. that will benefit us. Wishing all the best to AlgoTrades and Chris and looking forward to prosperous growth and relationship.

All the best!

Letter of Recommendation – Nikesh Simha

I am writing this short letter of recommendation for Chris Vermeulen and his AlgoTrades Automated Investing System to highlight his personal and professional excellence and the system's great trading record so far.

I have been a subscriber to the AlgoTrades automated investing systems for a very short time now – just over a month. I have been extremely satisfied by the system performance and Chris's professionalism. As you can imagine, I was very hesitant at first and I called the customer service number to speak to someone in person. I got through to Chris himself, and he explained how the system works, the things that are integral in the system to keep risk at a minimum and he answered all my questions.

So far the system has performed as advertised and I hope it performs as well in down markets too. The feature that drew me to his system was the hypothetical performance it has achieved in bear markets.

I whole heartedly recommend Chris and his trading system for part of your portfolio.

Sincerely
Nikesh Simha

Client Testimonials

"The only work I have to do is to setup the account. Once it is done, AlgoTrades took over and started making money for me. Sometimes small gains and sometimes big gains but always making money on each trade. I have tried many investment service and newsletters in the past, this is the best investment service for me, because it is completely hands-free and consistently making money for me."

Jason Dai, Toronto, Canada

"It's so hard to know what's for real and what isn't. Chris Vermeulen's AlgoTrades automated investing system is for real. I'm seeing it work in real-time, in my real account, right now."

Sheldon Krasner, Boca Raton, Florida, USA

"I am very happy since joining the AlgoTrades. I was a bit apprehensive in investing in the USA from Australia but I wanted to diversify and this is working well. I missed a big winner that would have been a 5% gain on my portfolio but they have all been positive and at present after 4 months I am up 8.5%."

"The good thing is there are only a few trades every few weeks and this combines well with my other trading in Australia. The account seems to be quite independent from yourself which is added security and I look forward to continuing our success together in the long term. Every trading day I get an end of day summary which also is reassuring."

Julie Moloney, Australia
